

Intelligent Surveillance When Put Together Can Track People

The Facial Recognition Technology Called Facenet Classifier Requires

1. Images Of A Person From Anywhere. A Small One 160x160. A Video Of That Person Will Do Too
2. Labels For That Person

Example

The Following Names Were Given At Many Stages.

As I Was Dying of COVID without treatment with my nose running, I did it even more.

WebRTC was used to transmit the screen I was typing on. So, What I Typed On My Screen Was Transmitted Using WebRTC To **EVERYONE**. I Do **WebRTC** <https://webrtc.org/> For Laptops, Desktops, Servers.
